

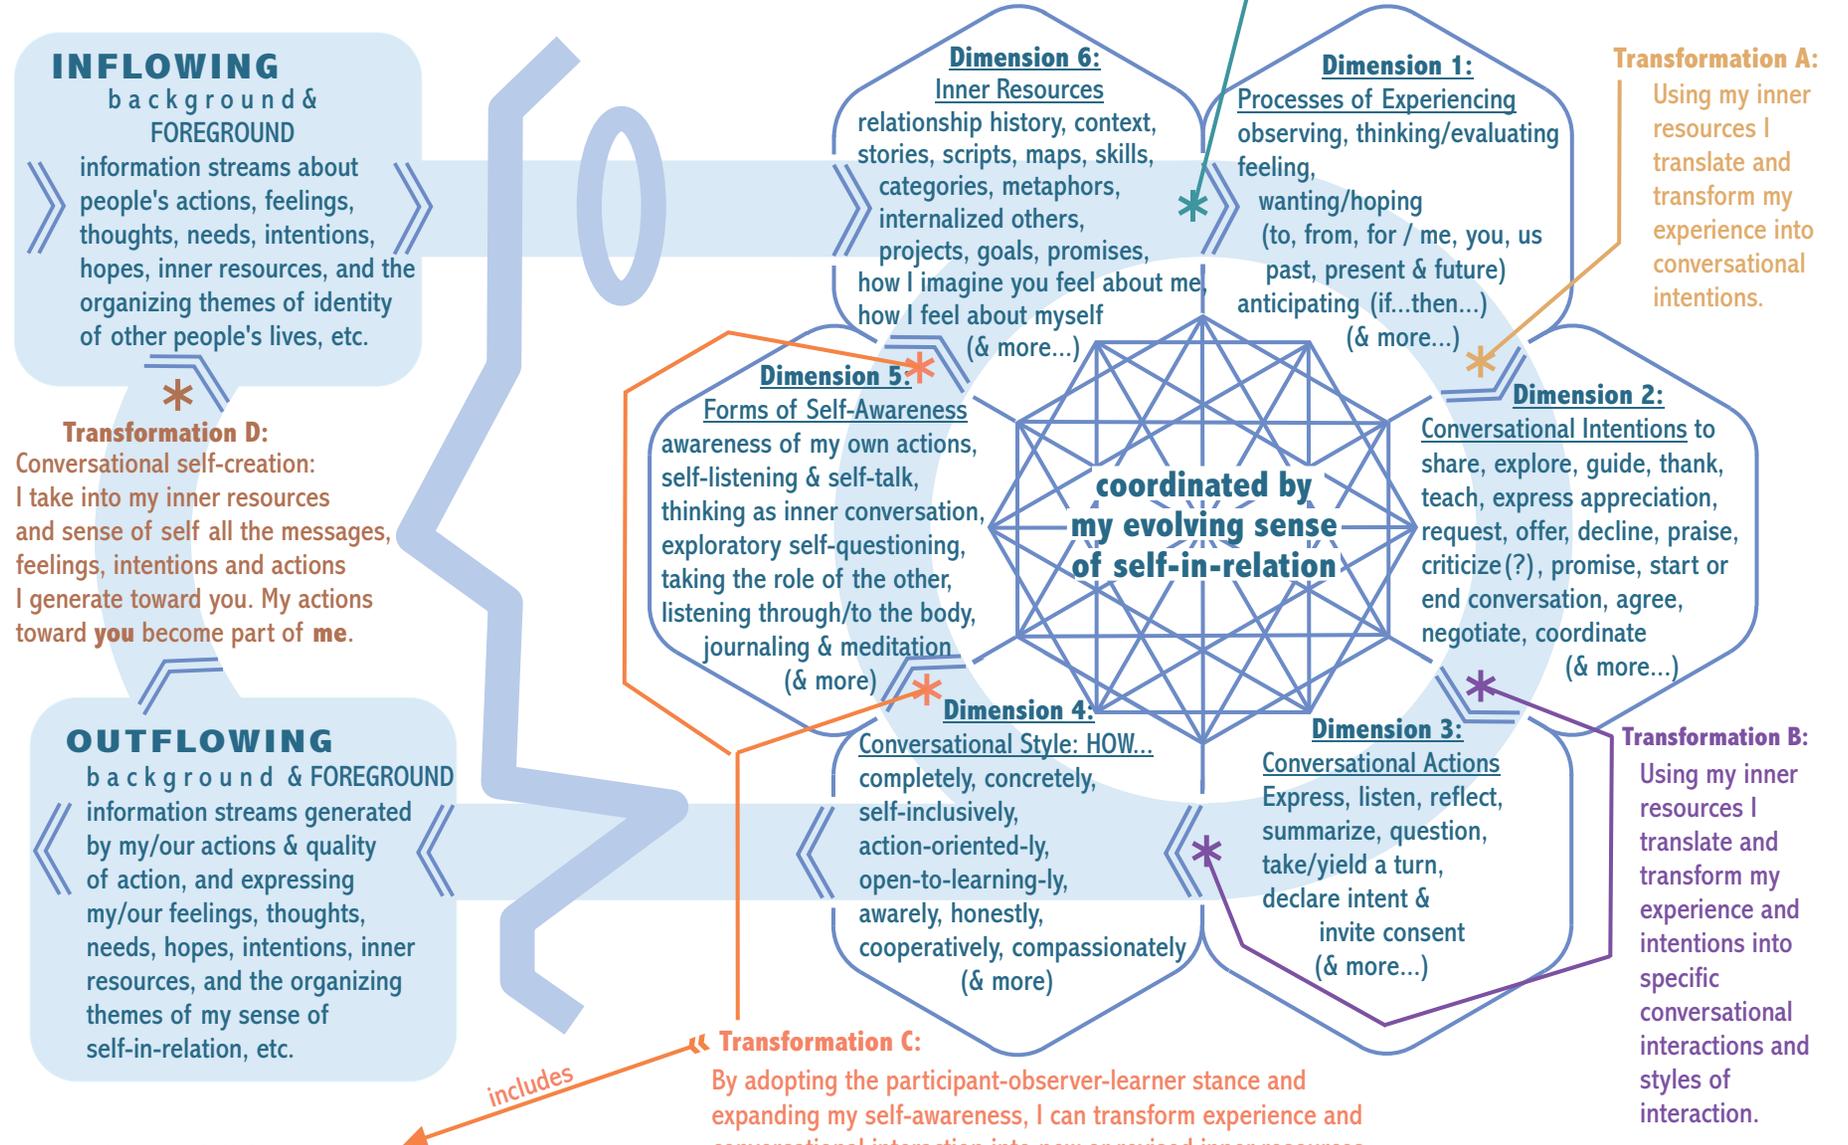

Figure 1-1. A SIX DIMENSIONS/FIVE TRANSFORMATIONS model of conversation

by Dennis Rivers (for more information, visit www.newconversations.net/geometry_of_dialogue/) Please note that the lettering and numbering schemes used in this diagram are for ease of reference only and are not intended to indicate what comes first. In this view, conversation is a circular process having many important influence points rather than one starting place.

Exploratory Self-Questioning

How does this feel to me? What am I experiencing right now? How could I/we have done that differently? What can I/we learn from this? What inner resources am I bringing to this experience? What alternative inner resources could I bring to this experience? What solution might bring everyone more of what they want? What is the most important thing I want in this situation? What "maps" am I using and how could or should they be revised? (& more...)
